

PA- Supplemental Guidance

ANM-25 Stockpiling of forages to extend the grazing season

Tall Fescue can be stockpiled from July 1 – October 31st.

Need to graze 1 animal unit per acre.

If establishing a pasture for stockpiling, use the following seed mixture:
60-70% fescue/max of 25-30% legumes.

If these fields are to be grazed in early spring and then stockpiled during the summer for late fall and winter grazing purposes, Endophyte free varieties of Tall Fescue do not need to be utilized.
