Species: _____

Tract No.: _____ Fields/Acres: _____

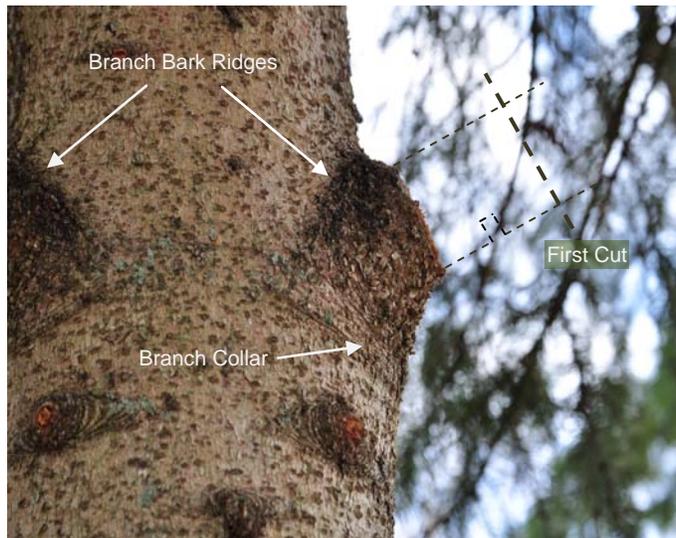

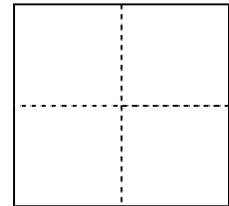

Purpose of Pruning: _____

Timing: _____

Method (corrective, lateral): _____

Acres: _____ Number of Trees/Acre (if applicable): _____

Location in Section

For Living or Dead Branches

Make cuts close to the branch collar or callus ridge. For branches greater than 1 inch in diameter, make the first cut as shown in the diagram.

Cuts should be made at right angles to the branch to minimize the exposed surface area.

Care should be taken so the bark around the wound is not damaged. Fix any broken or damaged stubs.

Certification: Compliance with FOTG Standards and Specifications.

Total No. Trees & Shrubs: _____

Certifying Technician: _____ Date: _____
