## Ranking Tool Summary

### for FY2013 - South Area - Grazing Land

(Released 12/03/2012 )

#### Description:

Before processing applications, planners should also be thoroughly familiar with the Regulation and Final Rule for the Environmental Quality Incentives Program (7 CFR 1466) and the NRCS Manual, Title 440 - Programs, in general with specific emphasis on Part 512 - Conservation Program Contracting and Part 515 - Environmental Quality Incentives Program. National Bulletin 300-13-1, dated October 10, 2012, provides direction for processing applications for Conservation Activity Plans (CAPS) for FY 2013. The ProTracts application type of "planning" or "plan-organic" must be associated with each EQIP CAP application and ranking of these applications is required for FY 2013 ProTracts will not allow the application to be approved or obligated without a ranking score for applications for CAPS. Eligible EQIP applications for CAPs may be approved on a continuous basis, as funds are available. 1. This ranking criteria will be used for all eligible EQIP applications in the grazing land category. Ranking points can only be given for practices which are included in the EQIP contract. 2. Documentation must be present in client case file to support ranking decisions. This should include completed specification, demonstrating how resource concerns are being met, as well as completed CST based plan approved by a Certified Conservation Planner. 3. A completed Wildlife Habitat Evaluation Guide is required for all applications where wildlife benefits are claimed. 4. At risk species are defined as Native species whose population (s) or habitat is in danger of loss by their listing as State or Federal Threatened or Endangered, Candidate, or State Species of Concern, or as focus species in Alaska's Comprehensive Wildlife Conservation Strategy.
