
Streambank Project Priority *for*

1) Is this plan or FA application for Streambank and Shoreline Protection (580) for a project identified in a River Corridor Plan approved by Vermont River Management or sponsored or under the technical leadership of experienced river partners? If No, mark the application as Low Priority in Protracts. If Yes, forward all necessary project information to the Stream Team (see program guidance document for more info).

NOTE: Minor projects with very little anticipated effect on stream condition can be sent to the Stream Team and could potentially be approved for FA.

Final river corridor plans can be found on the ANR website:

<https://anrnode.anr.state.vt.us/SGA/finalReports.aspx>

If the answer to the question above is No, and if the Stream Team has not approved the project due to minor anticipated effects to stream condition, the conservation plan is considered low priority and any FA application will be labeled "low" priority in ProTracts. The status of the application will remain eligible.

Answer:

Planner Documentation

I have documented the landowner's objectives, resource concerns and potential practices. The answers above are answered using my best professional judgment.

When answering No to any of the questions above, print out a copy of this sheet, sign it and file it with the landowners application as justification for a 'Low Priority' classification in Protracts.
