State Issues Addressed

Issue Questions	Responses
Species Presence (Answer yes to only one of the following 1-2)	
1. Is there credible verification of species occurrence (for example, photos, Heritage Database, USFWS, NRCS or State fish and wildlife agency documentation)? This should not be taken to imply that a site visit is required?	200 Point(s)
2. Based upon available species occurrence data and information, can the target species reasonably be assumed to occur within the offered area?	100 Point(s)

Distance to Known Populations (Answer yes to only one of the following 3-4)	
3. The offered area shares a common border with an area with known populations of the target species.	50 Point(s)
4. The offered area is proximal to an area with a known population of the target species. Proximal means within the accepted normal species dispersal ability.	35 Point(s)
"Focal Area"	
5. Will 75% or more of the practices be located within the "Focal Area"?	15 Point(s)
